We need to talk about **DYING**

CPR is not a treatment for **ORDINARY DYING**

**The DNACPR issue has trumped**

Enabling a Calm End in Final Stages of Dying

Everyone deserves a peaceful death in a place where the duvet matches the curtains

“we will offer you all of the treatments that will work but avoid ones that won’t”

Your body is tired and we already know your heart, lungs and kidneys don’t work very well. When eventually your heart decides to stop, we wouldn’t be able to re-start it and so we shouldn’t try… there’s a form we need to complete to make sure you can die peacefully when the time comes, and I’d recommend we do one for you, then you can forget all about it and get on with living

What is a good death?

*Calm, gentle care with no unnecessary interventions,*

by medics brave enough to stand back
